

YOUR SITE IN OUR SIGHTLINES.

Protect workers, property, and equipment while keeping a close eye on everything going on.

Transcend's monitoring services blend with Verkada's intuitive video security technology to create a rapidly-deployed, integrated security ecosystem built for flexibility.

KEY FEATURES

All the features you need to maintain safety, security, and keep an eye on what's going on— even while you're away.

Patrol Services

Staggered or closed daily perimeter patrols. Includes tours and checkpoint options dependent on the property size and security needs.

Mobile Surveillance Units

Choose from our family of units with solar or electric power to keep a round-the-clock watch on sites and new builds.

Video Security

HD security camera installations without all the wires. View all feeds from a singular command center and filter through content.

Access Control

Bluetooth-enabled access control reduces the need for physical badges or keys and allows you to control site access.

Alarms

Stop threats before they happen by setting boundaries and triggers to accompany immediate lockdown modes.

Air Quality Control

Manage unseen threats and stay within codes with alerts for noxious gases, Carbon dioxide, toxic mold, and more. Integrate with a range of cameras to provide full-picture Air Quality Control.

Security Monitoring

Our four-level monitoring program ensure eyes are always on your property. Choose from a range of monitoring alerts, including virtual site tours and proximity-based actions.
