

MOBILE SECURITY SOLUTIONS FOR YOUR SITE.

Transcend Security Solutions' **Mobile Patrol Division** delivers security solutions to clients who do not require dedicated on-site security services. Operating seven days per week, our fleet is easily recognizable and provides a strong visible deterrent when patrolling commercial properties, residential neighborhoods, manufacturing facilities, and more.

All Transcend Security Patrol Drivers are required to pass an extensive Motor Vehicle Records check, along with Driver and on-site training.

TOURS & SCHEDULING

Patrol tours can be set to run alone or in conjunction with physical security tours and/or other Transcend Security offerings.

Clients have the option to request staggered or closed patrols with various checkpoints and tour options depending on the size, location, and need of their site, along with parking and loitering enforcement.

VEHICLE TELEMATICS WITH GEOTAB

Real-time snapshots and vehicle monitoring to decrease vehicle and guard downtime and extend vehicle longevity.

Combining GPS technology and integrated telecommunications, Geotab's telematics system sends, receives and stores information about each vehicle in our fleet. We are able to monitor driver movements, driver routing, vehicle speed and idle times, system diagnostics, ensuring our patrol team is performing efficiently and effectively. Other features include:

- Custom route mapping.
- Vehicle Engine Health and Maintenance statistics.
- Route optimization for driver efficiency.
- GPS vehicle speed tracking.
- Driver behavior management and safety metrics.
- In-cab coaching alerts to minimize risky driving behavior.
- Advanced collision avoidance.
- GPS fleet and asset tracking.
