

BUILT FOR THE ENTIRE BUILDING.

Protect tenants, guests, and property while keeping a close eye on everything going on.

Transcend's physical security and monitoring services blended with Verkada's intuitive software and technology create an integrated security ecosystem devoid of wires, complicated installs, and frustrations.

KEY FEATURES

All the features you need to create a seamless visitor experience, increase security, and streamline administrative workflows.

Guard Services

Unarmed security for visitor management and lobby presence. Add traditional foot patrols and tours with door checks, fire panel operations, and more.

Alarms

Stop threats before they happen by setting boundaries and triggers to accompany immediate lockdown modes.

Mailroom

Streamline package deliveries and monitor mailroom activity and pickup with a single platform.

Patrol Services

Staggered or closed daily perimeter patrols. Includes tours and checkpoint options dependent on the property size and security needs.

Access Control

Bluetooth-enabled access control reduces the need for physical badges and allows you to control employee and visitor floor access.

Guest

Customize visitor check-in and create a seamless, secure visitor experience with native video security and remote door unlock.

Security Monitoring

Choose from a range of monitoring types and alerts, including virtual building tours and proximity-based actions.

Air Quality Control

Keep your tenants safe with alerts for noxious gases, Carbon dioxide, and vape detection. Integrate with cameras to provide full-picture Air Quality Control.

Video Security

HD security camera installations without all the wires. View all feeds from a singular command center and filter through content.
