

SECURITY THAT COMBINES MANPOWER, TECHNOLOGY, AND INNOVATION.

Transcend Security Solutions is a multi-service security provider, utilizing a best-in-class security management platform and integrated technology to provide clients with a customizable, interconnected security system that ensures quality of service.

PHYSICAL GUARDING SERVICES

Security solutions catered to high-rise buildings, outdoor retail centers, and other commercial markets.

- **Guarding Services**– Our unarmed Guarding Division provides personal interaction and a thorough, tracked security presence.
- **Patrol Services**– Offered alongside or instead of guarding, our Patrol Division provides a physical deterrent for a variety of sites couple with GPS technology and integrated telecommunications.
- **Additional Coverage**– We provide event security, Fire Watch Services and services for situations that do not require licensed guard patrols and tours.

TECHNOLOGY & MONITORING

Hybrid-cloud security technology pairs with around-the-clock monitoring for uninterrupted security.

- **Mobile Surveillance Units**– Our monitored standard, mini, and ultra-mini mobile surveillance units use hybrid technology blend to secure your property whether indoors or outdoors.
- **Robotics**– Monitored by our Analysts, Knightscope's autonomous, self-driving machines allow us to offer a new way to detect security threats.
- **Alarm Systems**– We install high-performance, wireless security systems that are simple to use and maintain. Intrusion sensors ensure threats are detected and stopped before they cause damage.
- **On-Premise Cameras**– We install and offer customized monitoring solutions for server-less, cloud-managed cameras equipped with AI-based video analytics like License Plate Recognition and motion plotting.
- **Access Control**– Seamlessly integrate your access credentials with video security or opt for the standalone option. Our Access Control solutions include optional key-less door readers, wireless locks, and role-based access control.
- **Visitor Management**– Offer guests a seamless check-in experience with pre-arrival options and host notifications.
- **Air Quality Control**– Manage the air quality across buildings and set notifications for alerts like vape detection, carbon monoxide, ammonia, and more.
- **Mailroom Management**– Keep track of incoming mail and shipments and manage deliveries across the department, office, or an entire building.
